

20<sup>th</sup> September 2010

To Whom It May Concern

Ocvitti approached us 12 months ago with field trials of their new Ocloc Product. Nigel and Brian installed them in our vineyard and The Terraces Vineyard Management put their harvesters over them. Ocloc withstood 97 kilometre winds and harvested incredibly well, and having just inspected them in September 2010 the product is looking very sound.

In McLaren Vale we now know that D'Arenberg, Tinlin's, Fox Creek, Wirra Wirra, Chapel Hill, Constellation Tintara and Gemtree have installed the Ocloc product and the feed back is very, very positive.

This is just what the industry has needed, long term cost reduction and environmental improvements, which in turn will lead to the long term sustainability of bottom line accounting.

Currently, we have just done field trials and time trials for the installation of Ocloc and the system has proven to be very cost effective.
