

## Netting and/or Frost Cap Manufactured in Australia

- **Ocloc NSC** is a multi-functional, push on, permanent netting and/or spray cap
- high grade, robust polymer construction creates a permanent addition to the trellis
- easy, push on application on all **Ocloc** products

### Bird Control

- netting cap for permanent net support

### Frosts

- with inclusion of spray nozzle, **Ocloc NSC** can mitigate the effects of frost
- can be installed for permanent frost netting protection
- micro sprays are permanently set, so no need for removal prior to picking or pruning
- **Ocloc NSC** removes the frustration of the netting snags
- targeted lineal spray patterns reduce water wastage

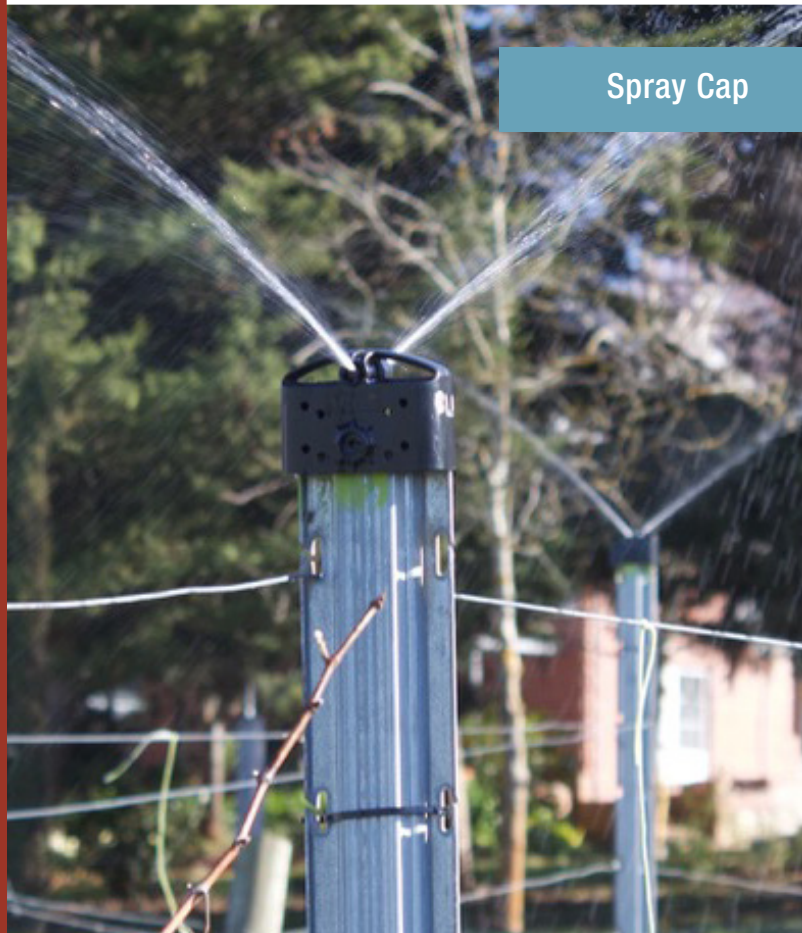

### Extreme Heat

- transfer of water during extreme heat events can reduce burning and crop loss

### Fires

- water usage through the **Ocloc NSC** during fires, could reduce infrastructure losses, vine and trellis damage

All **Ocloc** products are designed to be versatile, robust and cost effective to meet the ever-changing procedures and standards of the Australian wine industry.

Spray Cap

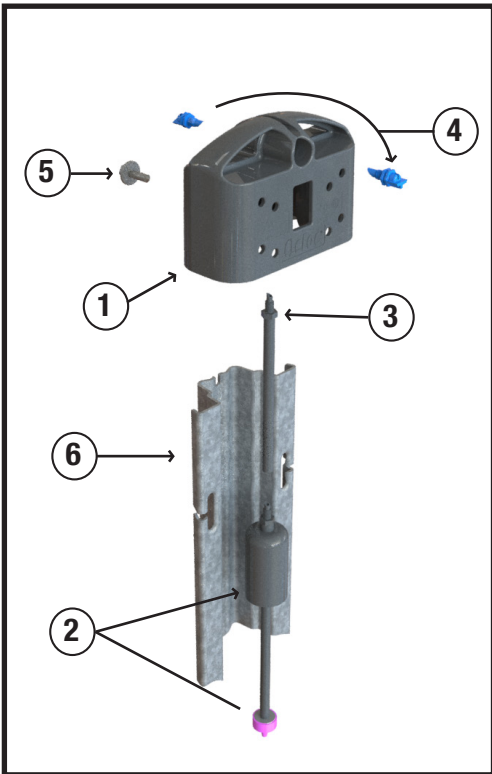

*Ocloc products are carbon neutral — 100% carbon offset —*

## Netting and/or Frost Cap Manufactured in Australia

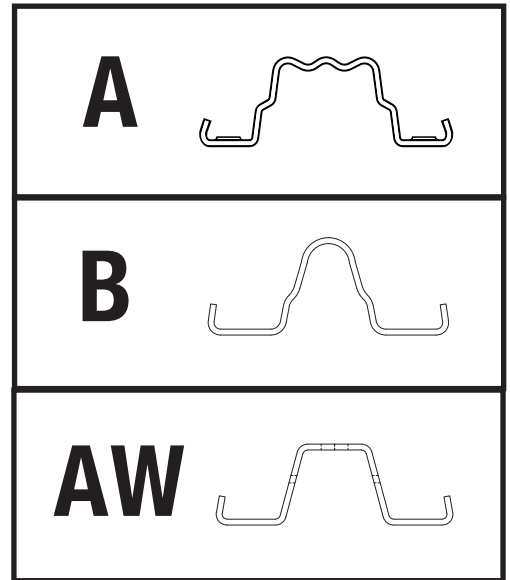

### Application:

1. **Hand pick** - no screw required
2. **Machine pick** - single screw

### Key:

- 1 Ocloc NSC Netting spray cap
- 2 Pip pulsator and flow regulator
- 3 Barb connector and tube
- 4 2x Ocloc micro sprayers
- 5 12g x 20mm Tek Screw
- 6 Ocloc A, B or AW

Ocloc NSC fits this range of Ocloc shapes.

- HDPE polymer
- food grade product
- inert and recyclable
- meets the safe drinking water Proposition 65 (USA)
- recycled content

*Ocloc products are carbon neutral — 100% carbon offset —*
